USA, Medium Sweepstakes, Daily Sweepstakes: Contiguous US (-HI, AK), 21+ Start Date: February 20, 2020 End Date: September 05, 2020 at 11:59 p.m PT Entry Frequency: 1 x Daily Per Person/Email Prize Draws: Grand Prize: A three-night stay at the Silverton Casino Hotel in Las Vegas, Nevada, two 3-day weekend passes to the NASCAR Xfinity Series race, two VIP access passes, a \$400 Southwest gift card, a \$100 credit for Twin Creeks House Steak and ground transportation. (ARV: \$1,300) By ThrillistPublished on 2/21/2012 at 4:00 AMFor nothing is sweeter than betting with your life on the type of car that betting with your money will prevent you from owning, kicking things in the fifth gear in Dream Racing, A new outfit by former Formula 3 champion Enrico Bertagaglia and Micheli's Supertourism competitor Adriano.The Prep: Things start with a crash course in demonic speed - how to follow the race lines, proper braking distances, emergency procedures in case you take the term crash course literally - and 13 minutes in a 3D simulator to test your newly learned skills. The car: A red F430GT tuned with race/hit springs, a roller bar, and brakes that will take you from 60-0mph in 1.8 seconds, which would be more useful if you weren't using the 512hp engine to head north to 120.The Track: Nicknamed the Diamond in the Desert, The 1.1 miles of the challenging infield course includes three corners to the left, six right-handed corners and a straight that is immediately followed by a braking area that leaves you at 55 mph, the second most effective way to ensure sammy Hagar doesn't show up, behind not allowing tequila on the track. Packages: Wet your feet with a basic five-lap plan, hit the Ultimate for three 6-7 lap sessions (broken by telemetry analysis and all captured on a DVD), or just ride two laps with an instructor while sitting with a shotgun, something you'll want to wrap your mouth if you've so much with your money that you can't even afford to rent a car for a few hours. EU antitrust regulators have asked advertisers for information on Google's advertising technology practices, a European Commission document viewed by Reuters. Owned by Alphabet Alphabet The world's largest online search engine has been affected by fines totaling 8.25 billion euros (\$10 billion) over the past three years for blocking its rivals in online shopping, Android smartphones and online advertising. Hylion appoints electrification leader Bobby Cherian as senior vice president, sales and supply chain. The United Arab Emirates Crude Oil Refinery Outlook to 2025 report has been added to the ResearchAndMarkets.com. Covenant Multifamily Offices, LLC announced the successful completion of its acquisition of One Advocate Group, a financial planning and advisory firm. Dublin, 20 January 2021 (GLOBE NEWSWIRE) -- The Stainless Steel Database has been added to the ResearchAndMarkets.com. This dedicated database is an essential tool for the stainless steel specialist. The stainless steel database consists of monthly production and trade over the past 11 years and is summarized by the product and trading partner for the top 20 producing countries and the top 20 consumers. Data on apparent consumption and summary of trade by country are also provided. Users can subscribe to full or limited access to this database for 12 months through the publisher's website using unique login data. Limited access subscribers only receive access to the database, under a single-user license. Full access subscribers will have a global enterprise license with the benefit of unlimited users to data across their entire corporation. Included with this subscription is the Annual Publication of Stainless Steel Statistics and the Stainless Steel Long Term Series. To learn more about this database, visit Research and Markets also offers personalized research services that provide focused, comprehensive, and personalized research. The S&P 500 and Nasdaq reached all-time highs Wednesday as Joe Biden was preparing to take over as president of the United States, while Netflix's stock increased after saying he no longer needs to borrow billions of dollars to fund his TV shows and movies. The shares of the world's largest streaming service increased by 14% to add more than \$30 billion to its market capitalization, to boost the broader Nasdaq 100 index. PRIVATE LOCATION CONTEMPLATED NOT FOR THE RELEASE, PUBLICATION OR DISTRIBUTION, IN WHOLE OR IN PART, DIRECTLY OR INDIRECTLY, IN OR IN THE UNITED STATES OF AMERICA (INCLUDING ITS TERRITORIES AND POSSESSIONS, ANY STATE OF THE UNITED STATES OF AMERICA AND THE DISTRICT OF COLUMBIA) (THE UNITED STATES), AUSTRALIA, CANADA, THE HONG KONG SPECIAL ADMINISTRATIVE REGION OF THE PEOPLE'S REPUBLIC OF CHINA OR JAPAN , OR ANY OTHER OTHER WHERE RELEASE, PUBLICATION OR DISTRIBUTION WOULD BE ILLEGAL. THIS ANNOUNCEMENT DOES NOT CONSTITUTE AN OFFER OF ANY OF THE SECURITY DESCRIBED HEREIN. BW Energy Limited (the Company) has contracted DNB Markets, a portion of DNB Bank ASA and Pareto Securities AS (the Managers), to assist the Company in a contemplated private placement (Private Placement) of new shares in the Company with gross profits of up to USD 75 million. Private Placement is addressed to Norwegian investors and international institutional investors in accordance with applicable exemptions from relevant registration, filing and prospectus requirements, and subject to other applicable sales restrictions. The net income of the Private Placement will be used for capital investments in Dussafu's license in Gabon, development of Maromba's discovery in Brazil, new companies and for other general corporate purposes. BW Energy CEO Carl Krogh Arnet comments; We tested the resilience of our strategy and business model in 2020 with a rapid and decisive response to lower pandemic and oil prices by reducing investments while maintaining operational regularity and generating a strong operating cash flow throughout the year. Carl Krogh Arnet continues; We have a busy year ahead of us with the start of planned production from Tortue's last two Phase 2 wells, the drilling of one more Hibiscus exploration well, and the start of Hibiscus/Ruche field development, including the conversion of the first jack-up platform to a production platform. Our current asset portfolio offers significant growth potential, and we see an increasing number of attractive inorganic opportunities. The increase in additional capital will strengthen our financial capacity, flexibility and ability to convert proven resources into highly profitable production reserves. The subscription price in the Private Placement will be determined by the Board of Directors or a subcommittee thereof (the Council) based on an accelerated process of creating books carried out by the Managers. The application period begins today on January 20, 2021 at 16:30 (CET) and will close on January 21, 2021 at 08:00 (CET). The Company, together with the Managers, reserves the right to close or extend the application period at any time in its sole discretion, in the short term. The minimum size of the order in the Private Placement is a NOK amount equivalent to 100,000 EUROS. The assignment of actions will be determined at the end of the book creation process. The final assignment will be made at the discretion of the Board in consultation with the Managers. No allocation will be made for amounts less than a NOK amount equivalent to EUR 100,000, except in accordance with the applicable exemptions from the requirements of Relevant. BW Group Limited, which is the Company's second largest shareholder and represented on the Board, has previously committed to subscribing to \$26.347,169 in the Private Placement, which is equal to its Company (35.13%). Carl Arnet, CEO of BW Energy, is committed to subscribing to USD 770,245, which is equivalent to his prorated stake in the Company (1.03%). The Board of Directors may allocate less than the pre-committed amount to BW Group Limited if it is considered beneficial for the overall transaction, the free stock float on the Oslo Stock Exchange and the Company's shareholder structure. The completion of the Private Placement is conditional on the approval of the Board. The delivery of the new shares assigned in the Private Placement, in order to facilitate the delivery-counter-payment and timely delivery of shares already listed to subscribers in the Private Placement, will be made by the delivery of existing and unconfiscated shares in the Company, in accordance with a share loan agreement concluded between the Company, the Managers and BW Group Limited. The shares loaned will be forwarded by the Managers to BW Group Limited in the form of new shares in the Company that will be issued in connection with the Private Placement. The Company has considered Private Placement in the light of equal treatment obligations under the Norwegian Securities Trading Act and the rules on equal treatment under Oslo's Book of Rules II for companies listed on the Oslo Stock Exchange and the Oslo Stock Exchange Guidelines on the Equal Treatment Rule, and the Board is of the view that the transaction contemplated meets these requirements and guidelines. Taking into account the time, costs and expected terms of alternative methods of obtaining the desired financing, the Council concluded that offering new shares in a private placement under acceptable conditions at this time is in the common interest of the Company's shareholders. The Company may, subject to the realization of the Private Placement, and certain other conditions, resolve the making of a subsequent offer of new shares that, subject to the applicable securities law, will be addressed to the shareholders existing in the Company as of January 20, 2021 (as recorded in the VPS two business days thereafter), which (i) were not included in the pre-sound phase of the Private Placement, (ii) were not assigned and (iii) do not reside in a jurisdiction where such offer is unlawful or, in jurisdictions other than Norway) require any prospectus, presentation, registration or similar action. Advokatfirmaet Thommessen AS acts as legal advisor to the Company in connection with Private Placement and Advokatfirmaet Schj-dt AS acts as legal advisor to Managers in connection with Private Placement. For more information, contact: Knut R. Stre, CFO BW Energy, +47 91 11 78 76ir@bwenergy.no About BW Energy/BW Energy is a growth E&P company with a differentiated strategy targeting offshore oil and gas deposits through low-risk phase developments. The Company has access to existing FPSO to reduce time to the first flow of oil and cash lower than traditional offshore developments. The main assets are 73.5% of the production of Dussafu Marine Permit offshore Gabon and a 95% stake in the Maromba field in Brazil, both operated by the Company. Total net reserves of 2P+2C were 247 million barrels at the beginning of 2021. CONTACT: Clare: clare@reportlinker.com USA: (339)-368-6001 Intl: +1 339-368-6001Dublin, January 20, 2021 (NEWS GLOBE) -- The United States Crude Oil Refinery Outlook to 2025 report has been added to ResearchAndMarkets.com's offer. United Oil Refinery Outlook to 2025 is a comprehensive report on the crude oil refineries in the United States. The report also provides details on oil refineries, such as name, type, operating status, operator, in addition to capacity data from major processing units, for all refineries in the United States for the period 2015-2025. In addition, the report also offers recent developments, financial agreements, as well as the latest contracts awarded in the country's oil refinery industry, whenever available. Scope Up-to-date information related to all active, planned and announced refineries in the country, including operator mergers and acquisitions and equityWriting, condensate divider, flirtation, catalytic cracking and refinery hydrocracking capabilities in the country, provided that capital mergers and acquisitions, and asset transactions in the country's crude oil industry are available. Whenever the best developments and contracts awarded related to crude oil refineries in the country are available, whenever reasons to buy Get a strong understanding of the country's crude refining industryManufacturing decision mainly based on a strong historical perspective and data capacityAssess of its competitor's main crude refining assets and their performance in the countryAnalyze the latest developments , financial agreements and contracts awarded related to the country's crude refining industryInquent the country's financial landscape by analyzing how competitors are financed, and the mergers and associations that have shaped the market Key Topics Covered: 1. Table of Contents1.1. List of Tables1.2. List of figures2. Introduction2.1. What is this report about? 2.2. Market definition3. U.S. Refining Industry3.1. U.S. Refining Industry, Key Data3.2. Based on evidence found as a result of the investigation, the ad surveillance agency filed a complaint with the FTC urging the agency to end Walmart's misleading claims in the U.S. once and for all. The retail giant is no stranger to the problematic claims made by the United States. In 2013, Walmart launched its American Jobs initiative, promising a multibillion-dollar investment in products that support American manufacturing. Just two years later, in 2015, a TINA.org found that the company's website was riddled with misleading statements in the United States and reported its findings to the FTC. The agency closed its investigation after receiving assurances from Walmart that it had cleaned up all false and misleading claims made in the U.S. on its website and put in place procedures to point out any future misrepresentations. Now Walmart is getting even bolder – trying to redefine the MUSA standard altogether. The company's Made in America ad campaign has aired on national television, promoted on social media, and appears on an America At Work landing page on its website, suggesting that made in America means produced, grown, assembled, or sourced in the U.S. This definition is much broader than that of the FTC, which requires products marketed as made in the United States or manufactured in the United States to be all or virtually all manufactured in the United States, meaning they do not contain foreign or insignificant content. In addition, consumers who use the Buy Now link, Search for products made in Walmart.com on the landing page are taken to another page that lists approximately 2,000 products that are presumably manufactured in the United States. However, TINA.org's research found that several of them, from foot cream to bath towels, do not meet unqualified FTC products made in the U.S. standard. Walmart's history of the misleading marketing claims Made in USA on its website now spans more than five years and is exacerbated by the current consumer need and desire to shop online during the global pandemic, according to TINA.org CEO Bonnie Patten. Obviously, as the world's largest retailer, the company's continued failure to address these issues cannot be related to lack of resources or sophistication. Interest in made-in-the-USA products has only grown since Walmart first launched its initiative employment, particularly during the pandemic, which has raised the supply chain and the country of origin's concerns among consumers. Based on its own data, Walmart claims that Made in USA is a strong driver of purchase decisions - 2nd only to Price and that 85% of mothers said it is important for a retailer to sell Made in USA products. And with Biden's incoming administration proposing a \$700 billion Buy American campaign, rest a sure that will continue to push products that are said to be American-made, whether that is true or not. To read more about TINA.org's research into Walmart's deception in U.S. marketing, see: www.truthinadvertising.org/tina-org-brings-walmarts-deceptive-made-in-usa-claims-to-the-ftc-again/ About TINA.org (truthinadvertising.org) TINA.org is a nonprofit that uses investigative journalism, education, and advocacy to empower consumers to protect against fake advertising and misleading marketing. CONTACT: Shana Mueller truthinadvertising.org 203-421-6210 smueller@truthinadvertising.org (Bloomberg) -- The European Central Bank is emulating its Asia-Pacific peers by controlling government borrowing costs in a unique and European way. The ECB is buying bonds to limit the differences between the yields of the strongest and weakest economies in the euro area, according to officials familiar with the issue, and one person says the central bank has specific ideas about which spreads are appropriate. An ECB spokesman declined to comment. Investors have long wondered whether the central bank has specific levels in mind when it tries to limit bond yields. The latest information on their strategy sheds light on how policy makers are navigating the complexities of the euro area that hinder public orientation of bond levels. Sovereign yields are key to combating the pandemic crisis. Not only do they influence all other lending costs, but maintaining affordable government borrowing has become a critical part of monetary policy as businesses and workers rely on massive, debt-financed tax support. The ECB's strategy explains why the spread between Italian and German debt has remained remarkably stable even as the Italian government approached collapse, after the central bank raised the pace of bond buying. Rate volatility is at historic lows, according to Tanvir Sandhu, chief global derivatives strata at Bloomberg Intelligence. Es unlike the so-called yield curve control deployed by the Bank of Japan and the Reserve Bank of Australia, which have publicly announced numerical targets for specific yields. In the case of the BOJ, it aspires to about zero percent in the 10-year government bond -- although it is speculated that the band could expand. ECB President Christine Lagarde, who convenes the first political meeting of the year on Thursday, does not have that luxury. She has to manage the monetary needs of a monetary union with 19 nations, each issuing her own debt. Right now, that means committing to block financial conditions in place through the crisis. These conditions are broadly defined, including all public and private sectors of the economy, comprising interest rates, as well as volumes and credit conditions, according to the December policy meeting account. While that strategy is similar to performance curve control, they call it something different, said Christoph Rieger, head of fixed-rate strategy at Commerzbank AG. My feeling is that this is a thing for the ECB, they're seeing it and they're actually boJ envious. They'd love to have something like that. Control of the yield curve has taken hold as central banks delve into their toolkits after lowering interest rates to historic lows and releasing trillions of dollars in bond purchases. In theory, it is cheaper than quantitative easing alone because investors are essentially told not to resist. The BOJ adopted the policy in 2016 as a stimulus tool to boost inflation. The RBA decided last March to keep three-year yields around 0.25%, and in November reduced it to around 0.1%. U.S. Federal Reserve Vice President Richard Clarida said it's part of the toolbox late last year. However, the promise has to be credible. Investors must believe that the central bank will spend everything it takes to defend its policy, and that is where the ECB is in trouble. For starters, it lacks a single link to aim. That will change soon when the European Union starts issuing joint debt to finance its \$750 billion (\$909 billion) recovery fund, but that plan is temporary linked to the pandemic -- the ECB could run out of bonds to buy. EU law also prohibits the central bank from funding governments directly. You have maintained your legal bond purchase programs by imposing limits on what you can buy and for how long, but the control of the yield curve is implicitly unlimited. There are a number of issues to opt for such a strategy, or add it to the ECB's toolbox, said Katharina Utermoehl, economist at Allianz SE. This could bring to light the idea that the ECB is actually making monetary financing. Read more: A quick take on controlling the performance curve in the US. The central bank has not rejected control of the yield curve, and the governor of the Bank of Spain, Pablo Hernández de Cos, said this month that it is an option worth exploring. Hernandez de Cos suggested aiming for a technical measure, the trade curve of the region's night index. Economists like Nick Kounis of ABN Amro have proposed using an average euro area bond yield weighted by national gross domestic product. Both Hernandez de Cos and Executive Board member Isabel Schnabel say the Governing Council has never discussed formal control of the yield curve. The measure carries broader risks, such as promoting reckless fiscal policy by alleviating governments from some market constraints. The U.S. Fed and Treasury agreed in 1942 to limit borrowing costs to finance the country's involvement in World War II. Five more years inflation was in double digits in the midst of the post-war boom and the central bank was forced to start backtracking. Explicit performance goals also make exiting politics a challenge. Investors are likely to dump bonds, boosting borrowing costs, at a time when they perceive that the target is about to be withdrawn. This may ultimately mean that the ECB has an advantage over what Lagarde has described as a holistic approach to maintaining favourable financing conditions. It's not as explicit as the Japanese do, but broader, said Florian Hense, Hense, economist in Berenberg. Once you exit that you explicitly control the performance curve, this commitment can be very costly. (Updates with speculation about the BOJ's performance target in the sixth paragraph) For more articles like this, please visit us at bloomberg.comWroon now to stay ahead of the curve with the most reliable business news source.©2021 Bloomberg L.P. The Telecom Retailers in Europe newsletter has been added to the ResearchAndMarkets.com offering. Stocks increased Wednesday, extending Tuesday's advances as investors awaited the first shares of Biden's incoming administration. A couple of streaming platforms and a dividend stock born again are already doing things right this year. (Bloomberg) -- U.S. home builders' confidence slid to a minimum of four months in January as businesses became a little less optimistic about sales against a back-to-back of higher house prices and construction costs. An indicator of the builder's sentiment fell to 83 December 86, data from the National Association of Home Builders showed Wednesday. The figure was weaker than the median forecast of 86 in Bloomberg's survey of economists. The second straight decline in confidence shows the extent to which higher costs of building materials, particularly wood, and rising prices for homes linked to lean inventory are slowing the momentum. Builders continue to face high pandemic-related supply chain challenges while calling for prices to hinder affordability, with many households priced higher than potential buyers are willing to pay. While housing continues to help boost the economy, limited inventory is limiting more robust growth, Robert Dietz, NAHB's chief economist, said in a statement. The shortage of buildable lots is making it difficult to meet strong demand, and rising material prices are far exceeding house price increases, which in turn is hurting housing affordability. An indicator of current sales fell to a minimum of three months, while sales expectations measures over the next six months and traffic from potential homebuyers declined to the lowest since August. Confidence measures decreased in all four regions of the U.S. (Add Chart)For more items like this, please visit us at bloomberg.comScrib now to stay ahead of the curve with the most reliable business news source.©2021 Bloomberg L.P.
